

# inContact Analytics

Gain actionable insights from your customer interactions

inContact Analytics gives you actionable insights from every customer interaction to guide high-impact initiatives for measurable improvement in customer experience and agent performance. Highly accurate results and visualizations provide an intuitive and quantifiable understanding of how every interaction influences the customer experience and your business results.

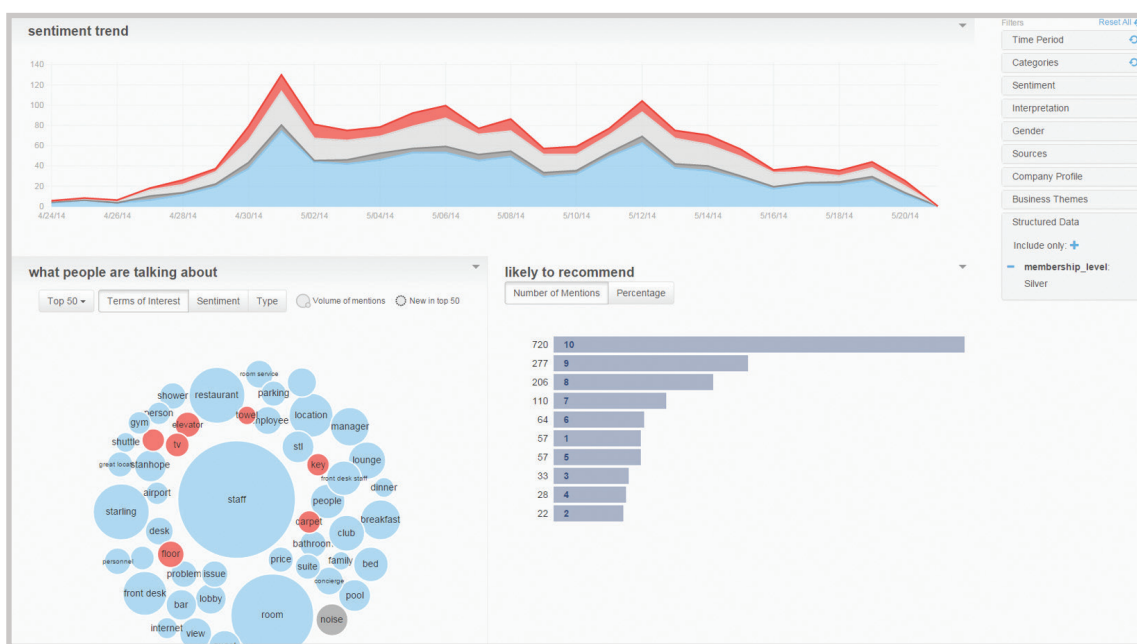

## Improve every customer's experience

You might suspect that your customers' experiences vary greatly depending on the agent, time of day, and other factors, but it can be difficult to track this information fully and consistently. With inContact Analytics, you can analyze every interaction to understand what transpired, identify outcomes, and evaluate your customers' experiences.

- Analyze 100% of recorded customer conversations to get the full picture.
- Track satisfaction and discussion topic trends across and within customer interactions.
- Pinpoint dissatisfied customers based on their sentiment and the topics of discussion.
- Enable proactive problem resolution by identifying dissatisfied customer interactions in near real time.

## BENEFITS

- Understand customers' true experiences by quantitatively tracking trends and satisfaction.
- Target drivers of strategic business outcomes, like first-contact resolution, to create high-impact improvements.
- Identify each agent's positive and negative behaviors to make coaching more effective.
- Reduce compliance risk by analyzing every interaction for potential issues.
- Focus agents on listening to and helping customers rather than just following policies and procedures.

See at-a-glance discussion topics and quickly determine which ones warrant further investigation.

### Increase improvement velocity and success

Many contact centers are disappointed when their improvement efforts seem to fall short or take forever to get results. inContact Analytics helps you pinpoint where the best opportunities for improvement exist and help you understand in detail what needs to change.

- Categorize interactions based on discussion topics and expressed sentiment to determine where issues are occurring most often and their causes.
- Search quickly using neural phonetic speech technology that combines the strengths of LVCSR and phonetic indexing for highly accurate results.

### Coach and train more effectively

Agents perform best when training is tailored to their needs, but it can be challenging to determine which topics are appropriate for each individual. With inContact Analytics, you can identify specific coaching topics and training needs for every agent based on their interactions with customers.

- Pinpoint interactions where agents did well or had difficulties for recognition or assistance.
- Review agent interactions based on discussion topics and sentiment to identify individual training or knowledge gaps for remedial action.

## KEY FEATURES

- Analysis of both voice and text interactions.
- Results updated throughout the day.
- Search interactions for any word or phrase used by customers or agents.
- Filter results by contact type, date/time, duration, and other metadata fields.
- 100% call transcription of voice interactions.
- Replay recordings with annotated results to quickly locate tagged segments.
- Sentiment analysis reveals perceptions of both customers and agents.
- Automatic categorization of interactions to identify common themes.

### Manage compliance proactively

It's crucial to understand quickly when and where you're out of compliance before damage is done. inContact Analytics examines all of your recorded interactions to detect when non-compliance actions occur. You'll know about potential issues in near real time so you can resolve them proactively before problems escalate.

- Identify when and where agents are out of compliance by detecting the occurrence or absence of key phrases.
- Make proactive corrections to mitigate compliance risk now and in the future.

### Make quality management a strategic asset

Randomly selecting interactions for evaluation can be haphazard, because it's impossible to target strategic improvement initiatives. With inContact Analytics, you can target interactions to evaluate based on their discussion and outcomes, rather than selecting randomly. Your quality team can help agents focus more on taking care of customers than simply following processes and procedures..

- Align your quality team's results with strategic objectives by evaluating interactions based on business value.
- Increase your quality team's productivity by significantly reducing the time spent searching for interactions to evaluate.

### About inContact

inContact makes it easy and affordable for organizations around the globe to create stand-out customer experiences while meeting key business metrics. inContact continuously innovates and is the only provider to offer a complete customer interaction platform in the cloud that is flexible, scalable and reliable for enterprise, small business, government and business process outsourcers. inContact is a part of NICE (Nasdaq: NICE), the worldwide leading provider of both cloud and on-premises enterprise software solutions.
